EDUCATION

KC College of Engineering, Thane B.Tech in Computer Engineering, CGPA 8.5+ Expected May 2028

TECHNICAL SKILLS

Languages and Frontend JavaScript, TypeScript, Python, SQL, HTML, CSS, React.js, Tailwind CSS, Redux, Zustand, GSAP, Framer Motion

Backend and Databases Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.IO, MongoDB, Mongoose, MySQL, PostgreSQL

AI, Cloud and Tools Groq API, Google Gemini, Anthropic Claude, OpenAI Codex, LLM Integration, Git, GitHub Actions, CI/CD, Vercel, Render, Cloudinary, npm

PROJECTS

DocSync Node.js, Tree-sitter, Groq Llama 3.3, GitHub Actions, npm [docsync-landing](#) 2026

- Built and published **@ishwarr/docsync** on npm, an open source developer tool that uses Tree-sitter AST parsing to detect when function signatures, parameters, or API routes change in code without a matching update in documentation.
- Computes a Drift Score (0 to 100) per changed construct and calls Groq Llama 3.3 to rewrite stale documentation and open a companion pull request automatically. Runs as a CLI or GitHub Actions CI/CD step with three lines of YAML configuration.

Streamora React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Zustand, hls.js, Gemini API [streamoraa.onrender.com](#) 2025

- Built full-stack video streaming with HLS adaptive bitrate delivery from 144p to 1080p. Upload flow is fully async: the server responds immediately, Cloudinary transcodes in the background, and a webhook updates the record when done, keeping the app server free of video processing load.
- RESTful API follows a routes, controllers, and models structure with dual JWT authentication across cookies and Authorization headers, Multer file handling with Cloudinary cleanup on failure, Helmet security headers, and rate limiting. Includes video upload, comments, likes, playlists, subscriptions, creator dashboard, and a Gemini AI integration.

ReBoxed React.js, Node.js, Express.js, MongoDB, JWT, RESTful API [reboxed.onrender.com](#) 2025

- Built a full-stack peer-to-peer escrow marketplace for second-hand goods where funds are held until both buyer and seller confirm the transaction, solving the core trust problem in resale platforms.
- Designed and shipped the complete product flow including listings, offers, escrow logic, and transaction history within a 36-hour sprint at AWS AXIOS Hackathon, IIIT Bhopal. Deployed and live on Render.

EXPERIENCE

Google for Developers x AICTE EduSkills Artificial Intelligence and Machine Learning Virtual Internship Jul 2025 to Sep 2025

- Completed structured modules on applied machine learning, model development workflows, and practical AI implementation as part of Google's developer skilling initiative under AICTE.

SmartED Innovations Campus Ambassador, Remote Nov 2025 to Present

- Connected 100 plus peers with skill-development programs and internship opportunities, bridging the gap between academic learning and industry expectations on campus.

HACKATHONS

Selected, SIH 2025 (Crowdsourced Civic Issue Reporting System) **Top 25, Singularity Hackathon 2026** (DisasterIQ) **Selected from 1,000 plus teams, Vibeathon 2025 Bengaluru** (VISION, accessibility assistive tech) **AWS AXIOS IIIT Bhopal 2025** (**ReBoxed**) **Code-O-Fiesta National 2025** (AI Resume Builder)

LEADERSHIP AND OPEN SOURCE

Open Source Maintainer — **@ishwarr/docsync** published on npm. GitHub Achievements: Pull Shark and Pair Extraordinaire.

Director of Digital Communication, Rotaract Club — Led digital communication strategy and branding across events and outreach campaigns.

E-Cell Member, KC College — Frontend contributor on the KC E-Cell website redesign and supported technical operations for entrepreneurship events.
